ACCESSORIES

Smooth movement slide-out tray puts your keyboard right where you need it, under your desk for improved ergonomics. Easy to install with sturdy metal clamps on any surface up to 1.5" thick. Impact resistant, plastic tray fits most standard and ergonomic keyboards. A great choice when under-desk cross bars, hardware, or other obstructions make permanent mount keyboard trays impossible to install. No screw installation does not damage the work surface.

AdaptivErgo Clamp-On Keyboard Tray

Overall Size: 30.7"W x 13"D
 Color: Black
 Material: Plastic
 Shipping Weight: 6.4 lb

ALEKBT1B \$99 EA

Casters provide flexibility to bring Sit-to-Stand workstations anywhere in your office, conference or huddle spaces. Move and reposition your Alera® Height-Adjustable Table Bases with these convenient casters. Easy to attach locking casters.

ADAPTIVERGO ANTI-FATIGUE MAT

Encourages proper ergonomics and reduces fatigue with this cushioned standing mat. Beveled edge lays flat on the floor to reduce trip hazards. PU-foam provides excellent cushioning while ensuring long-lasting resiliency. Ideal for use at sit-to-stand workstations, service counters, breakrooms, or wherever standing is required. Top surface features a molded grid pattern for enhanced traction. Combine with Alera® AdaptivErgo™ Height Adjustable Tables for even more ergonomic benefits with your sit-to-stand workstations. Easy to clean—just shake loose any captured debris and wipe down.

Overall Size: 19.4"W x 33.2"D x 0.7"H
 Color: Black
 Material: PU Foam
 Backing Material: Vinyl
 Shipping Weight: 6.1 lb
ALEAE23AFM \$125 EA

Ergonomics

Backrest

COOLING GEL MEMORY FOAM BACKREST

Soft, resilient memory foam cushion is pressure sensitive to help relieve stress points. Smart gel-cooling layer helps provides longer lasting cooling by dissipating heat. Long-lasting, fade-resistant fabric cover. Washable.

Color: Black
Exterior/Surface Material: Fabric
Interior/Fill Material: Cooling Gel & Memory Foam
Shipping Weight: 3.7 lb
ALECGC411 **\$72 EA**

COOLING GEL MEMORY FOAM SEAT CUSHION

Soft and resilient, pressure-sensitive memory-foam core. Heat-dissipating, cooling gel layer surrounding the memory foam core. Long-lasting, fade-resistant fabric cover. Non-slip under-cushion cover surface.

Color: Black
Exterior/Surface Material: Fabric
Interior/Fill Material: Cooling Gel & Memory Foam
Shipping Weight: 4.5 lb
ALECGC511 **\$91 EA**

MESH BACKREST

Ergonomically designed stretched mesh backrest supports the lower back. Breathable mesh fabric keeps the back cool and supported. Adjustable elastic straps secures backrest in place. Contoured shape and curves to keep the back in alignment. Great with office chairs, car seats, or in the home.

Color: Black
Exterior/Surface Material: Fabric Mesh
Shipping Weight: 1.1 lb
ALEBR118 **\$47 EA**

Footrests

ERGO TILT FOOTREST

Tilting footrest for proper ergonomic alignment. Clever foot adjustable tilt mechanism rolls back and forth for your ideal angle from 0 to 20 degrees. Ribbed surface prevents feet from slipping.

Tables

Transform any area into a flexible gathering space.

Table Collections

- Conference 30-31
- Training 32-33
- Hospitality 34
- Folding 35-37

Our versatile collection of tables is built to foster connection, collaboration, and productivity in any workspace. Whether you're hosting team meetings, conducting training sessions, or organizing casual gatherings, our tables provide the perfect foundation for dynamic interactions. With a wide range of sizes, shapes, and configurations, these tables can be easily adapted to suit the specific needs of your environment. From sleek conference tables to modular training setups, each piece is crafted for durability and functionality, ensuring that your space supports seamless communication and efficient teamwork. Designed with flexibility in mind, our tables create an inviting atmosphere where ideas flow and teams come together to innovate, learn, and succeed.

Seating

Get comfortable anywhere, any time.

Discover the perfect seating solutions for your office with our comprehensive collection of office seating, designed to support productivity and comfort in any environment. From task chairs that provide ergonomic support for long hours at the desk, to guest seating that offers both style and comfort for visitors, our seating options are tailored to meet the diverse needs of your workplace. Our range also includes versatile stools for collaborative areas or casual workspaces, offering flexible seating arrangements without compromising on comfort. Each piece is thoughtfully designed with durability, adjustability, and modern aesthetics in mind, ensuring your office is not only functional but also inviting. Whether you need a high-performance chair for focused tasks or a welcoming seat for guests, our office seating solutions provide the perfect balance of form and function.

- Folding & Stacking 59
- Guest Chairs 60-61

Buying Guide Chair Features

Find the functions you're looking for using the following icons shown throughout the seating section.

Pneumatic Seat Height Adjustment

Regulates seat height relative to the floor so that feet are flat on the floor—supports better circulation.

Back Height Adjustment

Positions height of lumbar support relative to the seat cushion to alleviate back stress.

Seat Glide Mechanism

Seat or back moves forward or back, then locks in position to create the proper seat depth for better back support and circulation to legs.

Tilt Tension/Tilt Lock

Tilt allows back to recline at a 1:1 ratio to seat for a comfortable reclining position and redistribution of pressure points. Tilt tension controls the rate and ease at which the chair reclines and the lock-out tilt function keeps chair in upright position.

Knee Tilt

Pivot point located below front half of seat. Allows user to keep feet flat on floor while reclining. Offers increased circulation and redistribution of pressure points.

Synchronized Knee Tilt

Combines, at a 2:1 ratio, the smooth recline of the back with the limited front rise of the seat to keep feet on the floor and improve circulation to legs.

Dual-Action Tilt

Back reclines at a 2:1 ratio to seat angle creating relaxed positions while keeping feet relatively flat on the floor.

Posture Lock

Holds back in place in an infinite number of positions within a fixed range to offer variety in spinal alignment and weight distribution.

Multi-Task Control

Single lever easily adjusts seat and back angles independently, providing an infinite number of locking positions within a fixed range for customized comfort.

Asynchronous Control

Three levers modify: angle of back relative to seat; tilt (free float or locking); and forward tilt. Offers a wide variety of movement, spinal alignment and weight distribution.

Dual-Clutch Posture Control

Seat and back angles adjust independently and lock in infinite positions within a fixed range – ideal for quick adaptation to different activities and multiple users.

Variable Synchro-Tilt

Back reclines in a 2:1 ratio to seat angle. Chair tilts freely, locks in five positions, or tilts forward to alleviate pressure points.

Integral Lumbar Support

Lumbar support within the chair back is height adjustable for proper placement; alleviates back stress.

ELUSION® TASK    

Multifunction mechanism with seat glide allows back angle adjustment relative to seat, adjustable tilt (free floating or infinite locking positions) and forward tilt. Cool, breathable mesh back. Contoured seat cushion with waterfall edge to help relieve pressure on legs. Height- and width-adjustable arms with soft polyurethane pads. Five-star base with casters for easy mobility.

ANSI/BIFMA Certification ANSI/BIFMA certified furniture meets high standards for indoor air quality as well as safety and ergonomics in order to minimize health hazards and make injury less likely. Specific performance tests were developed by the Business and Institutional Furniture Manufacturer's Association (BIFMA) and approved by the American National Standards Institute (ANSI). These tests determine the stamina of casegoods and seating in their day-to-day use on a single work shift over ten years under both normal-use and excessive-use conditions.

level™ "requirements" A product must first meet six mandatory prerequisites across the four elements and then accumulate points within each element, including product-related points, to determine its level. For more information, go to: www.levelcertified.org

To achieve level™ 1:

- conform with all six prerequisites
- accumulate between 32 and 44 total points; at least 5 of the total points must be "product" related points for level™ 1 certification

To achieve level™ 2:

- conform with all six prerequisites
- accumulate between 45 and 62 total points; at least 11 of the total points must be "product" related points for level™ 2 certification

To achieve level™ 3:

- conform with all six prerequisites
- accumulate between 63 and 90 total points; at least 18 of these total points must be "product" related points for level™ 3 certification

California Flammability Standards Bulletin CA 116 Specifies requirements, test procedure and apparatus for testing the flame retardance of upholstered furniture. Measures the cigarette ignition resistance of an actual item of upholstered furniture.

Bulletin CA 117 Specifies requirements, test procedures and apparatus for testing the flame retardance of resilient filling materials used in upholstered furniture. Measures flammability using both open flame and lighted cigarettes as the ignition sources. All upholstery components are tested.

Bulletin CA 133 Specifies the flammability test procedure for seating furniture used in public occupancies such as jails, prisons, nursing homes, healthcare facilities, public auditoriums and hotels. It tests completed items of upholstered furniture and measures the type of ignition that may be typical of arson or incendiary fires or common accidental fires in public buildings.

Composite Panel Associates EPP Downstream Program

Products carrying the EPP Downstream logo are manufactured by a company that has demonstrated its environmental commitment by purchasing at least 50% CPA EPP certified composite wood products.

NSF International NSF International, an independent, not-for-profit organization, helps protect consumers by auditing and certifying as safe: food, water and other consumer products. NSF is a World Health Organization Collaborating Centre for Food and Water Safety and Indoor Environments and an American National Standards Institute (ANSI) accredited standards developer.

ICON INDEX

Indicates a product that must be shipped freight.

Alera Access Plus

Indicates a product that requires assembly.

Small Parcel Shippable

Identifies a product which requires additional lead time.

Products certified as safe for food preparation, consumption and storage by NSF International.

Adjustable Glides: 1" to 2" leveling devices for stabilizing storage, chairs or panels. Also known as "height adjusters."

Anti-Rebound: The feature that ensures that a drawer will stay closed and not spontaneously recoil or roll out from the pedestal opening when the drawer is closed with normal force.

Articulating Keyboard:

Height-adjustable design swivels, tilts and rotates in order to facilitate the correct ergonomic position for arms, wrists and hands when typing. Retracts under the desk when not in use.

Ball Bearing Slide: A drawer device containing a number of metal or plastic balls that rotate for smooth opening and closing.

Base Cap: A solid cap that fits over a prong of the metal understructure base on a panel system.

Base Cover: The metal or extruded plastic part that covers the electrical power distribution system at the bottom of a panel system's workstation configuration.

Box Drawers: Small drawers, generally 6" in height, mainly in desks and pedestals.

Bridge Worksurface: Attaches between a desk and a credenza to form a U-shaped configuration.

Cantilever: Vertical slotted channels that accept the brackets to hang worksurfaces and storage pieces from systems furniture.

Casegoods: Refers to furniture made of hard materials, such as wood, metal, glass or plastic relating to desks, credenzas, bookcases, computer furniture and lateral files.

Caster Sleeve: A metal receptacle into which the casters are inserted.

Center Drawer (Pencil Drawer): The drawer mounted beneath a worksurface.

C-Legs: An upright furniture support leg in the shape of the letter "C."

Core (Sub-Core): Interior material used to construct veneer panels (i.e., particleboard).

Core-Removable Lock: Designed with a removable cylinder that can be interchanged as needed allowing users to access all furniture with a single key.

Credenza: A storage unit, generally 18" to 24" deep, used with desks in private offices.

Defeat Mechanism: The mechanism that helps prevent the accidental tipping of a file.

Desk—Bow Front: A desk shell in which the surface bows outward away from the user.

Desk—Double Pedestal: A worksurface with pedestals at both ends of the unit.

Desk—Table Desk: Versatile furniture component that functions as a table and/or desk depending on user's needs.

Dovetail: A flaring joint between two pieces of wood, forming an interlocking tight fit.

Drawer Dividers: A partition in a box drawer that separates or divides the front portion from the back portion.

Elevation: A line drawing providing more spatial perception of a furniture layout.

End Panels: Slab end-supports commonly found on either side of a desk worksurface.

Ergonomics: The study of equipment design to reduce operator fatigue and discomfort. A person's relationship and interaction within work environments.

Executive Chair: A high-back or padded chair designed for senior decision-makers.

Face Veneer: The most visible surface veneer.

Fiberboard: A composition board consisting of fine thread-like fibers of wood bonded together with synthetic resins.

File Drawer: A drawer that is generally 12" to 13" in height and deep enough to support hanging file folders.

Flipper Door: The front door of an overhead storage unit, common in systems or office plans.

Follower Block (in a file drawer): Interior drawer panel keeps file folders and other materials upright and toward the front of the drawer.

Footprint: The working square footage required to support a particular function; either a workstation or group of workstations.

Full-Height Pedestals: Pedestals that extend from the worksurface to the floor.

Fully Assembled: Product shipped completely built rather than in parts or as flat stock.

Gangging: The method of joining individual seating elements into one unit. Specifically refers to gangging chairs or gangging tables. Often seen in lounge areas.

Graining: The process of printing a natural woodgrain pattern onto another surface that may or may not be wood product.

Green: A term used in reference to environmentally conscious initiatives, such as recycling or using environmentally sustainable, compostable, reusable or biodegradable and/or energy efficient content in the manufacture of a product.

Grommet: A covering of a cut-out that helps drop wires and cords under a worksurface for wire management.

Guest Chair: Often referred to as a Side Chair, this is a chair used by those who visit an office for the purpose of a meeting or conference.

Hardwood: Designates lumber produced from broad-leaved or deciduous trees in contrast to softwoods from evergreen or coniferous trees.

High Pressure Laminate (HPL): Also known as plastic laminate. Produced by fusing together multiple layers of kraft paper saturated with phenolic resin, with a layer of melamine saturated decorative paper, resulting in higher impact resistance than most other laminates.

Hutch: Storage component with cabinets and/or shelves that sits above a credenza or desk.

Independent Seat and Back: On a chair, seat and back flex independently for automatic comfort.

Glossary

Inlay: Wood or other material set into corresponding carved out recesses, often producing a pattern.

Interlock Mechanism: A device that couples two or more drawers together to prevent simultaneous opening, averting injuries due to cabinet tipping.

Junction Box: An electrical outlet device or communications port box on an office wall generally requiring access for cord placement and plug-ins.

KD: Shipped Knocked Down or assembly required.

L-Unit: Consists of a front desk piece with a connecting “return” extending on either the “right” or “left” side, normally dependent on columns and entry door positioning.

Laminate: A product made by fusing thin layers of coated paper to an interior substrate.

Lateral File: A file cabinet where the file drawers are wide, as opposed to deep, allowing complete access to all files at once.

Layout: (Space Plan) A plan created by an interior designer or architect showing locations of tenant improvement and space utilization by the tenant.

Leather: Animal skin or hide that is tanned to preserve an otherwise perishable skin and protect it from water damage or bacterial decay. Various tanning methods give leather its unique character and quality. The tanning process lubricates the skin with oil to make it as pliable as possible.

Leather—Bonded: Material made of varying degrees of genuine leather combined with other substances to give the appearance of leather, but at reduced cost.

Leather—Dyed: Three processes are used to dye leather: aniline, semi-aniline and pigment (i.e., opaque color). The aniline process is used on top-of-the-line leather furniture in natural or full-grain leather. For skins with somewhat uneven color, a semi-aniline process is used that combines aniline dyeing and a pigment solution to make the colors more opaque. Pigment is used on the most heavily marked skins to completely cover them with opaque color.

Leather—Full-Grain: The thin, outer layer of a hide. Often the finest, most delicate, best quality and sophisticated in design. Aniline finishes are generally used to preserve full-grain leather.

Leather—Natural: A leather which has a distinctive smooth and supple feel, and a slightly shaded color due to the application of two-tone aniline or semi-aniline.

Leather—Pigment: A more durable leather capable of withstanding higher wear and tear. Made by a mid-priced process using more opaque pigments of semi-aniline dyeing.

Leathermate: Combination leather/vinyl that is a low-cost alternative to full leather upholstery. Typically used in low contact areas of a chair.

Legal Size: Sized for 8½ × 14 documents.

Letter Size: Sized for 8½ × 11 documents.

Leveling Glides: Support device for leveling or stabilizing furniture on uneven flooring.

Louvers: Slats that admit air and light; generally for ventilation or cooling.

Low Pressure Laminate (Melamine or TFM—Thermally Fused Melamine): Results when melamine paper is thermally bonded to particleboard or MDF panels. Offers less impact resistance than HPL.

Lumbar: The lower section of your back between the thoracic vertebrae and sacrum.

Management Chair: A mid-back chair designed for the person who spends a lot of time seated at a desk. Usually a chair with a 5-prong base fitted with casters.

Mechanism: The part of a chair that connects the seat assembly to the base and allows adjustments such as tilt, swivel, seat height, etc., to allow a user optimum comfort and productivity.

Medium Density Fiberboard (MDF): A composite wood product similar to particleboard and made out of wood waste fibers glued together with resin, heat, and pressure.

Melamine: A misused term often thought of as a type of laminate. Actually, it is a component layer found in laminate composites.

Mesh Seat: Seating products that have backs and/or seat cushion support derived from a porous, posture-fitting material.

Mitered: A joinery technique where two solid angled, beveled wood pieces are glued together at the corner

Modesty Panel (Floating, Formal, Full-Length, Full-Height, Open): A vertical sheet of material on the front of a desk covering the frame, providing privacy and reinforcement. Partial or ¾ modesty panels end approximately 8 inches above the floor. Full modesty panels extend completely to the floor.

Modular Furniture: Groups of freestanding tables, storage pieces and privacy pieces combined to give the appearance of a panel system but offering user-friendly reconfigurability.

Molding: A decorative plane or curved strip giving ornamentation or finishing.

Nesting: Describes pieces of matching furniture in descending sizes that fit inside of each other for the purpose of stacking.

Overhang: A desk’s front area that overhangs the body or panels, normally 6" to 12" that allows guests to move closer in.

Panel Systems Furniture: Modular furniture consisting of various height panels dividing space and creating privacy in general office areas. Configured with work surfaces and storage pieces.

Panels: Modular furniture sections used to define the limits of a workstation. Panels do not extend from floor to ceiling.

Particleboard: A higher quality board composed of distinct wood particles bonded together with a synthetic resin or other glues to form basic flakeboards or higher-quality fiberboards.

Partition: Inside floor-to-ceiling structures not otherwise meeting the criteria of walls. Partitions are movable or removable.

Pedestals: Storage components which consist of drawers in various configurations under a worksurface area.

Peninsula: A rounded-end top used in offices and/or workstations to accommodate meeting space. Also called a pork chop.

Plywood: Wood sheets glued together in three or more laminations.

Pocket Door: Storage doors that recess into the interior cabinet shell.

Polyethylene: The most extensively produced polymer, a lightweight thermoplastic; used especially in packaging and insulation.

Polyurethane: Various polymers used in flexible and rigid foams, elastomers and resins.

Post-Consumer Waste (PCW): Product that contains recycled material from products that have already been used by the consumer and then collected for recycling.

Posting Shelf: Pullout shelf used to sort and manage documents at the file.

Raceways: Tubes or channels designed to hold, guide and protect electrical wires.

Racking: The swaying that occurs when opening and closing the drawers of a file cabinet. Commercial file cabinets have features such as drawer suspension and leveling glides which prevent racking.

Recycled (also Recovered)

Material: Material that would have otherwise been disposed of as waste or used for energy recovery, but has instead been collected and recovered (reclaimed) as a material input thus avoiding the use of new primary materials.

Repeat: (Textile Patterns) The length and width measurement of a reappearing design or imprint on a fabric.

Retrofit: The act of improving an existing product with a newly introduced feature or attachment.

Return (V, Bridge, Corner Desk, Desk Return): A piece of furniture with a flat work surface that attaches to a desk to create an “L” configuration.

Reuse: Recovering value from a discarded resource without reprocessing or remanufacture.

Sealants: Finishing topcoat applied to an object by spray or wipe.

Seat Suspension: A system that supports the upper part of the seat assembly.

Shared Space: Two or more workers who share a single workstation and work tools.

Shell: Generally associated with modular office furniture, the desk shell is the sides (end panels), front (modesty panel) and top (work surface) of the desk.

Sled Base: On a chair, a tubular design approach to a chair’s base structure offered in either an arm/leg loop or platform rocker version.

Solid Woods: Wood panel or edge piece having minimal 5-mm thickness.

Spin Lift: On a chair, mechanical height adjustment operated by spinning a chair counter-clockwise to raise and clockwise to lower.

Spring-Activated Follower Block: A mechanism to keep files upright when file drawer is partially full.

Square Footage: Length times the width of a room, space, floorplate or fabric product.

Stained Wood: Wood with the natural color modified to some degree—to make it more even and to imitate other wood essences.

Star Base: On a chair, the base to which the casters are attached, having five “arms” and forming the shape of a star.

Suspended Pedestals: Pedestals that are hung from a worksurface and only extend three-quarter depth to the floor. Also known as “¾ pedestals.”

Suspension: The system that is used to support the drawer and facilitate its movement in and out of the pedestal, normally three-quarter or full suspensions.

Sustainability: A characteristic of a process or state that can be maintained at a certain level indefinitely. The term, in its environmental usage, refers to the potential longevity of vital human ecological support systems, such as

the planet’s climatic system, systems of agriculture, industry, forestry, fisheries and the systems on which they depend.

Swatch: A fabric sample used for determining finish and color compatibilities.

Task Chair: A chair designed to support individuals who perform task-intensive functions, set on a 5-prong centered base.

Thermally Fused Melamine (TFM): Results when melamine paper is thermally bonded to particleboard or MDF panels. Offers less impact resistance than HPL.

Tongue & Groove: A joint made by a tongue on one end of a board fitting into a corresponding groove on another edge.

U-Shape: Assembled desk, return and credenza storage that forms a U layout.

UV Finish: A color or wood finish that is light-baked onto a surface rather than rubbed on and absorbed into wood.

Vein Line: A design element, often called a “reveal,” which produces a visual demarcation of the individual pieces of the desk.

Vertical File: Filing units composed of drawers stacked vertically that store records from front to back rather than from side to side.

Waterfall Design: A softened, downward shape of a seat-front behind the back of the user’s legs that prevents nerve pressure, thereby increasing circulation.

Wire Management: The desktop grommet hole and channels used below the surface to manage cables efficiently.

Woodgrain Furniture: (Faux Wood) Exterior portions of furniture creating the impression of natural wood essence.

Workstation: A space where work is accomplished (inner office, open office area).

Worksurface: The top writing/storage surface areas of a workstation or office.
